

Resolve, to Study the Effects of 5G Technology on Bird, Bee and Insect Populations
and the Effects of Long-term Exposure on Children

L.D.

**Resolve, to Study the Effects of 5G Technology on Bird, Bee and Insect
Populations and the Effects of Long-term Exposure on Children**

Sec. 1. University of Maine System to study the effects of 5G technology and radio frequency. Resolved: That the University of Maine System shall review, either through clinical study or by reviewing a compilation of scientific literature, the effects of:

1. So-called 5G wireless technology on bird, bee and insect populations and migrations; and

2. So-called 5G wireless technology, radio frequency emissions at thermal levels and pulsed and modulated radio frequency radiation at nonthermal levels for extended periods of time on children in educational settings.

No later than December 6, 2023, the University of Maine System shall submit a report with its findings to the Joint Standing Committee on Energy, Utilities and Technology.

SUMMARY

This resolve directs the University of Maine System to review, either through clinical study or by reviewing a compilation of scientific literature, the effects of so-called 5G wireless technology on bird, bee and insect populations and to study the effects of longterm exposure to 5G wireless technology and radio frequency radiation on children in educational settings and to report findings to the Joint Standing Committee on Energy, Utilities and Technology.
